

LACTISIL GRASS PLUS

Flagship grass inoculant for the most challenged conditions (20-35% DM)

Lactisil Grass Plus is ideally suited to low dry matter grass and clover silage.

Four elite bacteria strains, at high levels, combined with an Enzyme System, means this product aids the preservation of nutrients and enhances feed value.

Lactisil Grass Plus produces a very rapid fermentation for difficult conditions.

Product Profile:

- *Pediococcus acidilactici* (NCIMB 30086) at 4.4×10^{10} cfu/g
- *Pediococcus acidilactici* (NCIMB 30085) at 1.0×10^{10} cfu/g
- *Lactobacillus plantarum* (NCIMB 30084) at 6.7×10^9 cfu/g
- *Lactobacillus plantarum* (NCIMB 30083) at 6.7×10^9 cfu/g
- Xylanase enzyme pack

Lactisil Grass Plus treats silage at a rate of
1,000,000 cfu/g
